

Stolen Bicycle Update

1989 Trek 1100 Touring Road Bike (Red)

On June 22nd, 2023, at approximately 9:30 AM, I (Nolen James Felten), had parked my bicycle in the fenced in dumpster area at Casey's General Store and clocked in to work. About 5 or 10 minutes later, my coworker went to take out the trash and discovered that both our bicycles were stolen.

Bicycle Serial Number

When I first got the bike, I had taken a photo of the serial number. However I could not read the number due to the paint. After some tinkering, I believe the serial is “**107414**”.

Possible Suspect

When I was walking away from the bicycle, a white box truck was backing in the handicap parking spot next to the entrance of the dumpster area.

I do not know the make, model nor year of the vehicle. The truck was **dirty**, had a **roll up door**, and the **back bumper was about shin high**

On **June 24th, 2023**, my co-worker Amber Bannon said that she remembers the truck from that morning, and pointed out that the driver never entered the store.
